# Easy to Use

With **PropertyView's PEAK** software, your organization will be up and running quickly. Peak software has a linear workflow that makes the program easy to navigate and learn.

We also recognize that the greatest expense implementing a new property management system is not necessarily the cost of the software, but the time and training required to deploy it within your organization. Our Client Services Team is experienced in property management, property accounting, software implementation and technology management and support. You benefit from that experience the moment you view Peak for the first time. We help you minimize migration costs and maximize your return on investment.

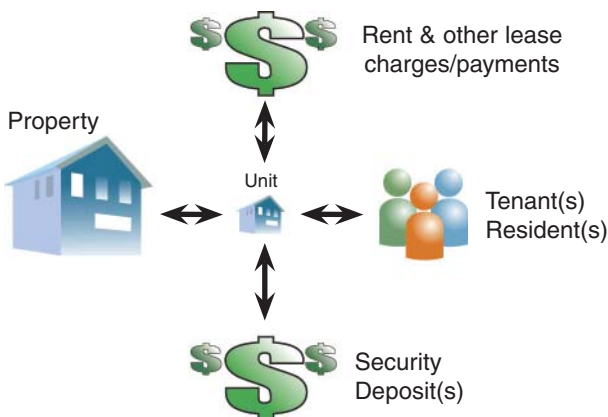

## The flexibility of PEAK's unit-based system is perfect for:

- Multifamily – Maintain and access resident demographics, lease history, ledger activity, contact activity and more all from within the resident record.
- Commercial – Track and reconcile CAM charges for your tenants.
- Homeowners Associations – Track primary owners and/or lessees with reports and logic designed especially for HOA
- Single Family Homes – Flexible trust accounting logic and work order reserves help you better serve your owners as well as residents.

“ I would recommend this program over Yardi, AMSI, and Onsite – for its ease in use but more importantly for the customer service provided. ”

## Unit Based

**PropertyView's PEAK** is a unit based system. Unit based logic has a proven track record to keep users organized and manage company policies. Peak does this using a combination of global and property settings. Once these settings are configured, they will guide your staff with daily data entry that supports your company's operational policies.

**Export** – and even email – your reports with the click of a button!

In order to maximize functionality, **PropertyView's PEAK** has integrated Business Objects' Crystal Reports software directly into our system. Users are able to view all of the standard PropertyView reports using one of the most flexible report writers available. Using our Crystal Reports package, you can:

- Export reports to a wide variety of formats, including MS Word, MS Excel, and many others.
- Email reports to an unlimited number of recipients directly from the software.
- Edit existing reports and/or create custom reports for your PropertyView software.

Navigation: Details, Recurring, Comments, Work Orders, Parking, Ledger, Calendar, Update Info, User Defined, Attachments, Insurance, Leases, Deposits, Applications, Guarantor

**PropertyView's PEAK** is a robust property management tool as well as accounting software package. All information related to the resident can be accessed directly from within the resident record. Information such as ledger history, demographics, work orders, and contact history are available at the click of your mouse. Additionally, the processing of rent receipts, security deposits, renewals, and notices can all be done all in the resident record. The workflow is easy to learn!

# Traffic & Applications

Using **PEAK's** Traffic module, leasing staff can track prospect contact by phone call or visit. The prospect's traffic record is converted to an application in one click and the applicant record can be moved in just as easily. Applicant screening integration is available with ResidentCheck which alleviates duplicate applicant entry to obtain screening results. Guarantors can also be tracked and screened for each applicant as needed.

# Complete Accounting

**PropertyView's PEAK** offers a fully integrated Accounts Receivable, Accounts Payable, and General Ledger accounting system. The software is designed to operate on a cash or accrual basis. Peak's unique transaction processing removes any difficulty associated with normal general ledger processing and adjustments.

Peak's Purchase Order module allows companies to set purchase order approval permissions at the user level accommodating a combination of percentage or dollar amounts as they relate to Month-to-Date or Year-to-Date budget activity. The Purchase Order module integrates with Accounts Payable, so users can easily convert purchase orders to invoices.

Let us show you how this logic works to better serve you, saving you time which equates to money.

PEAK software is an extremely valuable business tool that has helped us grow our business and provide quality service to our clients.

# Work Order System

Use **PropertyView's PEAK** to track service requests for all of your properties. The recurring work order feature can be used to maintain an on-going preventative maintenance schedule. Work Orders can be assigned to vendors or maintenance staff. A copy of the work order can be printed or emailed.

Track work order detail and compile the results using the Work Order Time & Detail report or the Work Order Statistics reports. The automatic work order receipt email feature will enhance communication with your residents. And, let's not forget Peak's work order survey which is valuable for evaluating and maintaining service quality.

# Portal

**P**ROPERTYVIEW'S Portal puts information at the fingertips of your Prospects, Owners and Residents. Accessing information has never been easier. The portal is designed to synchronize with your property database, so information entered on the portal displays in Peak. Dashboard navigation makes it easy for your customers to locate information on the Portal.

Prospects will enjoy the ease of viewing property information including property photos, a site map and neighborhood demographics. A simple or advanced search is available for locating unit availability. From the search results page, a prospect can immediately submit a guest card for the unit of their choice.

Sel	Property Name	Unit No.	Neighborhood	Sq. Ft	Market Rent	City	Unit Type
<input checked="" type="checkbox"/>	Highland Park Properties	H-01-0112	Park Reserve Estates	950	\$700.00	Highland Park	1 Bedroom, 1 Bath

Owners will enjoy viewing their financial reports on line. Their dashboard will display a list of properties with quick statistics.

Residents will enjoy the ability to submit a service request at their convenience in just a few clicks and even monitor the status of the request. Ledger balances are displayed along with the latest receipt transaction amount and a link can be available directing them to your on line payment processing service.

No.	WO #	Property Name	Issue Title	Date	Unit No.	Status
